

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INSTRUCTIONS

FILLING OUT "LIBRARY WANTS"

Enter on the blanks entitled "Library wants" the titles of publications found in this list which are desired.

Enter but one title on a block, and do not run beyond the blue lines.

Duplicate copies of these "want" lists should be retained by the library for checking purposes, as no detailed invoice will be sent with shipments.

In making selection bear in mind that the number of copies of each book in stock is limited and only those publications which will be of service should be requested.

Great care should be taken in transcribing the titles. Be sure they are accurate.

As entries appear under both subject and series headings, selection should be made from the series where possible, in which cases the series designation **only** need be given.

To avoid duplication do not check both subject and series entries.

In the case of the Congressional Series, the serial number is all that need be given.

Return only the list of "wants" properly filled out.

The requests will be filled in the order of their receipt. No requests will be considered unless the lists are properly filled out in every particular.

Extra copies of Free List 1 or Circular 18 will be furnished on application.

State definitely the number of "want" sheets you will need; this can be determined by checking this Free List and dividing the total number checked by ten (the number of entries to a "want" sheet).

Those books which can be furnished will be promptly forwarded, and the "want" slips for those not on hand will be filed for checking, and whenever any of the publications are received they will be forwarded.

In the future this form of request will be adopted for all "wants." The system recently installed makes it possible to handle this portion of the business very easily, and will provide the libraries with a surer method of filling up gaps than the previous spasmodic endeavors have developed.

No letter need accompany these "want" blanks, but the name of the library must appear at the top of the first sheet of a list, and the library number must in every case be plainly stamped or written on each block of a blank which is used.

Books sent out upon request of libraries are required by law to be for public use without charge, are always stamped "Property of the United States Government," and must not be destroyed, removed, or otherwise disposed of except as this office shall direct.

IMPORTANT: Return Circular 18 and your "want" lists in **same envelope**.

RETURNS OF DUPLICATE OR UNUSED DOCUMENTS

State on Circular 18 sent herewith the number of documents you wish to return to the Superintendent of Documents and the number of mailing sacks and labels you think necessary for their delivery. This office will then furnish sacks in which to pack them, and addressed free postage labels or franks for their return to this office by mail.

No invoice need accompany the books, but a statement of the number and character must be furnished.

Only public documents issued by the United States Government can be received by the Superintendent of Documents.

It will be of service to this office if you carefully note your library number and refer to it in your future correspondence.

Address all shipments and communications:
